 12M: 12M gewig (12- en 18 mnde)  
 Volw gewig: Volwasse gewig  
 GDT: Gemiddelde daaglikse toename (groei)  
 Kleiber: Kleiberverhouding (doeltreffende groei op veld)  
 VOV: Voeromset verhouding (kg voer/kg gewigstoename)  
 Lengte: Liggaamslengte  
 Raam Punt: Skouer of heup hoogte  
 SO: Skrotum omvang  
 OEK: Ouderdom met eerste kalf  
 TKP: Tussenkalfperiode

# Logix Genetiese Katalogus

Die Seleksie Waardes in hierdie verslag dui die genetiese meriete van diere aan – alle omgewings-effekte is uit die waardes verwyder. Seleksie waardes is 'n kombinasie van relevante teelwaardes. Die inligting is gebaseer op diere wat wetenskaplik korrek en presies gemeet is volgens internasionaal aanvaarbare metodes. Teelwaardes word beraam uit verskillende bronne van inligting: voorouers, eie prestasie en nageslag.

## Maklike interpretasie van Seleksie Waardes:

- Gemiddeld van lewendige diere in die hele ras: 100
- Bokant 100: meer gewenste rigting,
- Onder 100: minder gewenste rigting

## Akkuraatheid (Akk):

Die hoeveelheid inligting beskikbaar vir teelwaarde beraming word aangedui met die **akkuraatheid (Akk)**. Hoe nader aan 100, hoe meer inligting. Jonger diere het laer akkuraatheide as ouer diere.

Inligting wat gebruik word, is 'n kombinasie van die volgende:

- **Ouers:** bekend, akkuraatheid van ouers se teelwaardes
- **Eie meting:** Dier self gemeet vir eienskap of gemeet vir geneties gekorreleerde eienskap
- **Nageslag:** Aantal nageslag gemeet vir eienskap of gekorreleerde eienskappe

## Wye interpretasie van Akk:

Akk > 80%: Baie inligting. KI bul,

baie nageslag

Akk > 60%: Dier het gemete nageslag

Akk > 30%: Dier gemeet

Akk < 30%: Min inligting

| Sub Waarde   | Wat beteken 'n waarde bo rasgemiddeld (100)?                            |
|--------------|-------------------------------------------------------------------------|
| Kalfgemak    | Kleiner kalf by geboorte – makliker kalwing                             |
| Melk         | Koeie met meer melk en beter moeder eienskappe                          |
| Kalfgroei    | Swaarder kalf by speen as gevolg van groeikragtigheid van die kalf self |
| Onderhoud    | Diere met laer behoeftes vir onderhoud (laer Volwasse gewig EBVs).      |
| Vrugbaarheid | Koeie / dogters wat vroeër en/of meer gereeld kalf.                     |

| Ster Gradering | Seleksie Waarde |

| Remarks: We used Popeye in our stud, and his first calves are looking very promising. A bull with great length, good topline, and impressive hindquarter. He is out of one of our greats, Pop 871. |                     |                    |                 |                     |                    |                    |                   |                    |                   |                   |                    |                             |

| Remarks: Another Honey bloodline bull. His dam is a full sister to Roechama Honey Badger who Kevin and Carl Miles bought. This bull has length of body and good width. Look at his very good figures throughout. |                    |                   |                     |                    |                    |                   |                   |                   |                   |                    |                                          |

| Remarks: A long-bodied bull with lots of muscle expression and a typical Angus head. His dam is a product of an embryo flushing, and traces back to the famous Ladybird 980. |                    |                    |                      |                    |                    |                   |                     |                    |                   |                    |                                      |

| Remarks: Here is a bull that can be used on heifers, with birthmass of 33kg. His dam produced 11 calves with a lcp of 362. The Calidad daughters are nice, so this bull should breed good replacement heifers. |                      |                    |                   |                     |                    |                    |                   |                    |                  |           |                    |                 |

| Remarks: Die vers wys waarom haar pa Elevation so goedgeadoen het. Breedte in die bors, breedte op sitbene, goeie toplyn, lengte en baie kapasiteit. Met dit alles nogsteeds baie vroulik. Goeie speenindeks: 123 en goeie melksyfer. |                    |                   |                     |                    |                    |                   |                    |                   |                   |                    |                                 |
