Priority Highest

Hi Nina

Trust you are well?

Please note the following.

LIST OF PENDING REGISTRATIONS

The following animals have been culled today:

SHU 18-072
SHU 18-145
SHU 19-014
SHU 19-134
SHU 19-147

We would appreciate it if the following animal could be culled as well: **SHU 19-171** My system will not except it as the computer number seems to be missing and I can't track it down.

The following animals are experiencing DNA problems and the lab cannot determine their Sires with the hair samples that have been sent off, so we're working on getting this resolved ASAP. They are:

SHU 19-007
SHU 19-009
SHU 19-033
SHU 19-114
SHU 19-139
SHU 19-159

All animals from SHU19-182 up to and including SHU20-071 are waiting on DNA results from the lab to determine the Sires.

The following animals with PNI reasons were inspected on the 20th August 2020:

SHU 17-051
SHU 17-087
SHU 17-164
SHU 17-171 – was rejected at inspection and to be culled.

There are a few more animals which needs culling and will be doing so soon. I'm still working on the EDIT List. Will have that done soon too.

Please confirm receipt of this email?

Kind regards

Elmarie

Geagte Teler

Die Logix stelsel is 'n baie verfynde stelsel en baie kontroles en toetse word op 'n rekord gedoen alvorens dit opgeneem word in die stelsel. Logix het ten doel om te verseker dat betroubare (skoon) data opgeneem word, wat voldoen aan biologiese, sowel as rasstandaarde vir verdere gebruik in Genetiese evaluasies. Rekords word in baie gevalle ingedien, maar is daar nog inligting uitstaande. Om te verhoed dat die transaksie verlore gaan, word die rekord aangeteken met n Hangende registrasie (Pending) status en rede. Dit veroorsaak dat sekere redigering eers gedoen moet word en addisionele inligting nodig is alvorens 'n rekord aanvaar word in Logix. Voorgaande het tot gevolg dat daar 'n Hangende registrasielys is, ook bekend as 'n "Pendinglys" wat die redigeerklerk nie kan oplos nie. Die teler moet dan gekontak word om verdere inligting te verkry, om die rekord volledig op te neem.

Aangeheg is u kuddes se "Pendinglys" en word u versoek om asseblief dringend aandag te gee aan elke transaksie. Indien so 'n transaksie nie binne twee (2) jaar opgelos word nie, sal die transaksie van die stelsel verwyder word en sal u weer die transaksie moet indien. Hierdie lyste sal op 'n meer gereelde basis aan u gestuur word, met die doel om die diens aan u te verbeter.

Daar word graag van u verneem in die verband. U terugvoering moet asseblief gerig word aan die persoon wat die epos aan u gerig het en nie na Logix nie.

Dear Breeder

The Logix system is a very refined system and many checks and tests are done before being incorporated into the system. Logix's aim is to ensure that all biological and breed standards are adhered to and thus ensure that reliable (clean) data is recorded for further use in Genetic evaluations. Records submitted, in some cases, need additional information to be processed fully. To ensure that the incomplete data is not rejected by the system, the information is recorded with a Pending registration status and reason. This results in Pending lists being generated after the clerk cannot resolve the issues. The breeder must then be contacted to obtain further information to record the transaction fully.

Attached is your herd's Pending List and you are kindly requested to reply on every transaction. If such a transaction is not resolved within two (2) years, the transaction will be deleted from the system and you will have to resubmit it. These lists will be sent to you on a more regular basis for the purpose of improving our services to you.

We look forward to hear from you. Please sent feedback to the person from whom this email has been sent and not to Logix.

Groete
