Hi

The bul WO 140037 was transfered to Riverglen on 2019/07/04 and the calves were born at least 265 days after that date will be recorded. Can you please give us some numbers of calves net recorded for this bull because we do not see any calves birth notified that is stuck.

I also see some of your cows' ID numbers in your Bengu is not correct. Example is ID FXF 100000 with comp nr 0072802739. I would like to suggest you do a 5 generation update on your Bengu but change all these ID numbers first to the correct ID . This example is FXF 10 616F.

Herman

Good morning Twane,

I hope you are well, please can you update us to why the calves from this bull (WO140037) still do not reflect on logix.

Kind regards

Allan

Good Day

I would like to give feedback on the abovementioned bull.

This animal was not registered as an AI bull

However, the necessary documents was send to the appropriate breeder to register.

Kindest Regards

Twané Meyer
