Subject: RE: Notice of payment: SA Studbook

Good Day Sonja

Hope that this e-mail finds you well.

Thanks for the email, yes, it was my plan, but last week the turbo of my bakkie blew and this cost me R10 000, so I am unable to pay the Society.

For the record, after farming outside Randfontein for the past 14 years, I have finally been given notice as the whole farm has been sold, and all the tenants have been given notice, I must be off by 31 August 2021, so all my cattle will have to be sold before then.

Further to the above I confirm that I WILL honour all my outstanding Debt, times have just not been on my side this year. I also herewith confirm my resignation to the Society.

Payment plan, I will do the best I can to have this completed before the next AGM, so as to keep my name in good standing.

Wishing you all the best and a blessed 2021

Kind Regards

John van den Bos

Managing Director

Morning John

Trust you are doing well.

Your email sent to me on the 19th of October 2020 refers.

You indicated that you will be paying the Societies account before the meeting. I controlled the bank statements and we haven't received any payment.

Have a nice day and will you please be so kind as to send me the "POP".

Kind regards / Vriendelike groete

Good Day Sonja

Hope that this email finds you well.

Ag jong hier is ma die betaaling vir SA Studbook.

I will be payng the balance owing to Pinzyl before the meeting, but please be advised that I will be resigning as well, from early next year all my cattle will be on the market.

Kind Regards

John van den Bos

REPORT COMPILED PER OWNER

NB: Please review your participant details and add / correct where necessary.

CORRECTIONS

1. The first step in the process of creating a new product is to identify a market need. This involves conducting market research to understand the preferences and behaviors of potential customers. Once a need is identified, the next step is to develop a concept that addresses this need. This concept should be unique, valuable, and feasible.

2. The second step is to create a business plan. This plan should outline the company's mission, vision, and goals. It should also include a detailed description of the product, the target market, and the marketing strategy. The business plan is a critical document that guides the company's operations and helps to attract investors.

3. The third step is to secure funding. This can be done through a variety of sources, including venture capitalists, angel investors, and crowdfunding. Each source has its own requirements and process, so it's important to research and choose the right one for your company.

4. The fourth step is to develop a prototype. This is a physical model of the product that allows you to test its functionality and gather feedback from potential customers. It's important to create a prototype that is as close to the final product as possible, so you can accurately assess its market potential.

5. The fifth step is to conduct a pilot test. This involves selling the product to a small group of customers and monitoring their reactions. This test helps to identify any issues with the product and provides valuable feedback for improvements.

6. The sixth step is to launch the product. This involves creating a marketing campaign to promote the product and reaching out to potential customers. It's important to have a clear marketing strategy and to be prepared to respond to customer feedback.

7. The seventh step is to monitor the product's performance. This involves tracking sales, customer feedback, and other key metrics. This information is used to make adjustments to the product and marketing strategy as needed.

8. The eighth step is to scale the product. Once the product has been successfully launched and is performing well, the next step is to expand its reach. This can be done by entering new markets, increasing production, and implementing a more aggressive marketing strategy.

9. The ninth step is to continue to innovate. The market is constantly changing, and it's important to stay ahead of the competition by developing new products and improving existing ones. This requires ongoing research and development.

10. The tenth step is to exit the business. This is the final step in the process, and it involves selling the company or its assets. It's important to have a clear exit strategy in place from the beginning, so you can maximize the value of your company when you decide to leave.
