Subject: H 18-27(f) Registration

Good afternoon, Liesel

I would like to request the late registration of the following animal, H 18-27(f).
 Under the previous rules that were implemented by the Namibian society, this animal was not registered in time, which subsequently means that her calves are also not be registered.

H 18-27 (f)
 Her D.O.B = 08/12/2018
 Sire = H 13-10
 Dam = C 10-250
 DNA profile number: A467715 (Unistel)

Her calves

1. H 21-10 (m)	- (DOB 20/09/2021)	DNA No: 6711U003
2. H 23-16 (f)	- (DOB 01/04/2023)	DNA No: 16576U008
3. H 24-16 (f)	- (DOB 30/01/2024)	DNA no: 19451U006

As you can see, she is a SP (F4) Droughtmaster and has been bred to a Droughtmaster bull throughout her life.

My request from the Droughtmaster Society of SA is to reinstate the cow H 18-27 and all of her progeny.
 Hurwitz Farming accept to pay any late birth penalties and reinstatement fees on the cow and her progeny.
 The progeny have undergone mandatory inspections which can be provided by either Ian Currin or Marius Barkhuizen.

Kind regards,

--
