Hi Marietjie, please accept the following births:

CVL20-44

CVL20-19

CVL20-25

Regarding CVL20-40, the dam CVL16-74 exceed age first calf. Did she maybe had a 2019 calf?

Kind regards

Liesel Grobler

Subject: ANIMALS NOT REFLECTING

Hi Louise, I have entered birth notifications for animals that have calved and the calves do not reflect on my list.

CVL 16 – 74 had a calf CVL 20 – 40. I have sold this animal with a calf because she exceeded the 39 months. I have now cancelled the dam and cannot find the calf CVL 20 – 40.

CVL 17 – 14 calved on the 20/11/20 with a calf CVL 20 – 44. No details of the calf or of the details reflecting on the dam of having a calf.

CVL 17 – 14 was given permission to remain in the stud when it was identified that her and some other cows would be exceeding there 39 months.

Please help with this. I have attached the correspondence.

Where do I find my error list on logix ??

Regards

Peter
