Subject: TSAR Beef

Good day Chantelle,

Please can you reinstate the following cows:

1. RPE 21-30
2. PAD 16-437
3. LAR 19-326
4. RPE 19-267
5. RPE 18-72
6. RPE 18-63
7. RPE 16-436

TSAR Beef is a new stud, and they had recently changed management, it was only after the change that they discovered that the birth data of these cws was never submitted. The data has now be added to logix, including that of last season and 2024, so everything should be fine now once the data is captured. The

animals were producing, it was just the data that they hadn't sent in.

Thank you for your assistance and time.

Kind regards,

Sandile Nzuzo
