Subject: Completing error list

Hi Siebert & Marietjie

Once again, thank you for all continued help.

Finally, I have all cattle with two indexes as required and my list neaten up and correct. I only have the 3 calves on the error list left to sort out.

FR 24 0049- Dam FR 21 0016 (dam FR 13 03 has failed DNA test so lets remove FR 21 16 and her calf from our records so this calf is removed from our error lists). I can delete the cow and calf but I'm not sure about clearing the error list.

FR230047, Dam FR 190017, incorrectly deleted. On the spreadsheet attached is her calving record. I got crypto in my Charolais calves in 2023. We lost a couple calves, all more than 2 weeks of age. This cow calved in 2022 and 2023.

FR 230025 belong to FR 190009. The DNA results on results 16844 page 2, confirm this. The calf that is registered to her in 2023 is actually the calf of FR 170009 as indicated in the spreadsheet attached. I never sire verified this calf as it is an AI calf, so it was unnecessary. How could I change this so my details are all up to date.

Kind regards
Delwyn
