Subject: List of Skietlaagte calves births and to transfer please
Attachments: LIST OF SKIETLAAGTE CALVES BORN IN 2020.xlsx

Hi Ann and Sonja,

As you may both know, Skietlaagte has leased my cows for two years. The 2019 calves have already been transferred to Skietlaagte. Now we need to register the births of the 2020 calves and transfer them into Skietlaagte's name. Please see the attached list of 28 calves. (Skietlaagte has said they will pay for any late birth notifications.) With a lease arrangement like this there are always delays in getting the info on time so maybe Sonja will forgive Skietlaagte the late birth notification fines?

The cows remain in my name and will return to Vrede next year.

Please note the calves born in May were born in early winter. Then the calves from SF20/18 up to SF20/40 were born in late winter. The SF calves from SF20/41 to SF20/44 were born in early spring.

They were all raised by their own mothers except for SF20/31 whose mother died but that was adopted by another cow and then later by other cows when it could sometimes drink from them.

The lick given was a production lick. The colour of the calves are all typical.

Please let us know if you have any questions?

Regards,
James Stephen
