Hi Marietjie-

Thank you for the error list. This is what I have on my beefpro.

E200014 dam E160048 aborted a calf (E180601) on 20/12/18 so she was in calf. It was one of the group hit by red water.

E200017 dam E150104 aborted a calf (E180600) on 29/12/18 - also one of that group.

E200030, E200044 and E200041 - I will check with Lara at embrioplus on the sire.

E200026 - please reinstate her dam E160064. I have no cancellation here and she is alive and well!

E200107 - dam E160040 had a commercial calf (unregistered) E190521 on 4/3/19.

E200080 - dam had a commercial calf E190522 (unregistered) on 13/3/19

E190293 - I did explain that the calf E190295 was an error so please cancel that birth.

170157 should be E170157 with computer number 0086065398.

I hope that sorts some of them out. I will come back to you after I have checked with embrioplus re the embryo calves.

Thank you so much. have a good day - Judy

Dear Breeder

The Logix system is a very refined system and many checks and tests are done before being incorporated into the system. Logix's aim is to ensure that all biological and breed standards are adhered to and thus ensure that reliable (clean) data is recorded for further use in Genetic evaluations. This results in Editing lists, also known as "Error lists" being generated after the clerk cannot resolve the issues, and the breeder must be contacted to obtain further information to record the transaction fully.

Attached is your herd's Editing List and you are kindly requested to reply on every transaction. If such a transaction is not resolved within two (2) years, the transaction will be deleted from the system and you will have to resubmit it. These lists will be sent to you on a more regular basis for the purpose of improving our services to you.

We look forward to hear from you. Please sent feedback to the person from whom this email has been sent and not to Logix.

Geagte Teler

Die Logix stelsel is 'n baie verfynde stelsel en baie kontroles en toetse word op 'n rekord gedoen alvorens dit opgeneem word in die stelsel. Logix het ten doel om te verseker dat betroubare (skoon) data opgeneem word, wat voldoen aan biologiese sowel as rasstandaarde vir verdere gebruik in Genetiese evaluasies. Dit veroorsaak dat sekere redigering eers gedoen moet word voordat 'n rekord aanvaar word in Logix. Om hierdie rede is daar 'n Redigeerlys, ook bekend as 'n "Foutelys" wat die redigeerklrek nie kan oplos nie en die teler moet gekontak word om verdere inligting te bekom om die rekord volledig op te neem.

Aangeheg is u kudde se Redigeerlys en word u versoek om asseblief dringend aandag te gee aan elke transaksie. Indien so 'n transaksie nie binne twee (2) jaar opgelos word nie, sal die transaksie van die stelsel verwyder word en sal u weer die transaksie moet indien. Hierdie lysie sal op 'n meer gereelde basis aan u

gestuur word met die doel om die diens aan u te verbeter.

Daar word graag van u verneem in die verband. U terugvoering moet asseblief gerig word aan die persoon wat die epos aan u gerig het en nie na Logix nie.

Groete

LOGIX
