Lea,

Sien asb korrespondensie van teler ivm geboortes wat gelaai is maar die geboortes wys nie op sisteem nie.

Ek het gevra dat teler die detail aanstuur sodat ons die geboortes kan probeer opspoor.

Baie dankie.

Groete,

Miki Fourie

no, JOY 24 - 243 was not bottle fed.

Details for JOY 24 - 153
SIRE: CEF 13 - 317
DAM: JRP 14 - 38
DOB: 07/09/2024
BIRTH WEIGHT: 38

Details for JOY 24 - 155
SIRE: CEF 13 - 317
DAM: JOY 18 - 143
DOB: 07/09/2024
BIRTH WEIGHT: 34

I amended it on my side through Bengu, but when i tried to generate a list of births not sent before they wouldn't show up, as i thought they would. Please advice if there is something else i should have done?

Thank you

Hallo,

Hoping all is well.

I do apologise that JOY 24-243 was not loaded, have corrected that. Just a question, was she bottle fed? There is a option when loading the wean for a bottle fed calve, the index's are then adjusted accordingly. Please le me know if we are to change that so that she is placed in the correct place in the test.

The two new births JOY 24-153 and JOY 24-155 does not show on my side. Send me the detail so I can go to Stambook and let them check on their system. (They have a lot more functions on Logix).

Thank you.

Kind regards,

Subject: Wean Test Report

Hi Miki

Hope you well.

I have just done a new birth notification for JOY 24 - 153 AND JOY 24 - 155. Please could you see if they have been loaded on your side? If they have, please could you add them to the Wean Test Report, as they are obviously not on at present.

JOY 24 - 243 is also not on the Wean test report. Please could you check why she was not on?

Many thanks
