The diagram illustrates the experimental setup for studying the effect of initial concentration on reaction rate. It shows a reaction vessel (a beaker) containing a mixture of reactants. Arrows indicate the flow of reactants into the vessel and the flow of products out of the vessel. The reaction is labeled as $A + B \rightarrow C + D$. The diagram also shows a graph of the reaction rate versus time, with the rate increasing as the reaction proceeds. The graph is labeled with 'Rate of reaction' on the y-axis and 'Time' on the x-axis. The curve shows a sharp initial increase in rate, followed by a gradual decrease, indicating that the reaction rate is highest at the beginning and decreases as the reaction proceeds.
