Hi Marietjie and Linette

I trust you have both had a wonderful Christmas and here's to wishing you a happy new year.

Please can you attend to this error when back in office:

I incorrectly recorded the bull calf KCM200063 as belonging to dam KCM170083. This calf's dam is actually JMS170083. Please amend as the cow KCM170083 hasn't yet calved.

Please also reinstate KCM170041 and change her sex to a female. She was incorrectly recorded as a male. Please capture a calf for her as follows:

KCM200048 born on the 23 September 2020, a heifer calf named Red Mini 048. The sire is CP168288 and the birth weight was 35kg. The calf was born by natural service and is Red in colour.

Regards
Carl
