Hi Evelyn,

All the best for the new year. See you on the 13th.

I am busy finalising my herd list. Here are a few outstanding documents and mistakes I picked up including the results for the 2 pending calves TOR 20-67 and TOR 20-81. **SIEN ASSEBLIEF DNS UITSLAE AANGEHEG.**

1. TOR 20-70 is listed as pending. This calf was sired by TOR 17-127, natural mating. **DEKKING IS**

OP LOGIX, STEL ASSEBLIEF PA REG.

2. TOR 20-35 should be removed from the Society record, as dam failed inspection. [SKRAP – calf is op EDIT LIST/REDIGEERLYS](#).
3. TOR 20-80 the system doesn't recognise the sire of this calf, but we do have semen usage from him; V 12-134. [STEL REG, TELER IS MEDE-GEBRUIKER sedert 15.11.2019](#).
4. The following cow, TOR 17-120 does not appear on my herd list.
5. I made a mistake with my ear notching. Can you please change TOR 20-258 to TOR 20-285.

These are the allmy blatent mistakes to date.

When do additions for the agenda for the AGM have to be submitted?

Thanks for everything.

Regards

David

Dear David,

Thank you for choosing ZooOmics™ for your Animal Genetic Services.

Please see the attached results for order **ZO2020/1752**, which include:

- 2 DNA Profiles
- 2 Parentage certificates
- 1 Parentage summary

I have also attached the Studbook output should you wish to send the results to them.

Please note that we will be closed from the 24th of December 2020 till the 4th of January 2021.

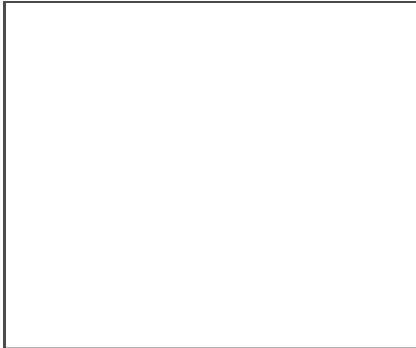

Have a lovely day further.

Kind regards

Candice Jooste, MSc
