Morning Twane/Siebert.

Hope all good your side.

Need some help once again.

I sent all the DNA from Zoomics last year for bulls , but I don't see it transferred to any of the bulls on logix, from that list. Some of those bulls are for sale this year, can you please update it all for me asap so I can get my ducks in a row. Don't want to have trouble closer to the time of our sale in July.

Also BA 150700. Her calf is TG 190030. I think we entered it incorrectly as TG 190029. Can you please fix for me.

Also please can you enter the sire of these two:

TG 150038 and TG 150020 sires are : Ole Yeller L 5367 Reg no0025779737.

Thanks

Louise English
