Good day
Hope you well
With regards to reinstating the bulls that were inspected, you can go ahead with them.

The animals
23-69 and 23-89 can be reinstated

24-411 I have to rebrand and reinspect next year because there's been a duplication so you can leave that one out for now.
Many thanks
Irfaan

Subject: 2026 Inspection 0579531NGI Amajuba

Good morning Faizel & Ahmed

I herewith confirm that the inspection conducted on 25 May 2026 was captured, except for the bulls that were indicated for reinstatement. Referring to the attached email dated 18 June 2026, I await your response on how to proceed.

The following animals were inspected as FR's but have a CAN (cancelled) status.

ANS 23-69

ANS 23-89

ANS 24-411

Please confirm whether I should continue to reinstate them and capture the inspection?

Attached is an updated inventory list.

Kind regards

ELDORÉ GROBLER
