Good morning
Hope you well

There has been a typo mistake on **ANS 23-89**
The correct number for the animal is **ANS 23-87** which is on the inspection list and should be a normal inspection for her, not inspected as FR.

The animal **ANS 22-114** is indeed a bull. May you please do a sex change on Logix.

Thank you
Irfaan

Good morning Irfaan

I trust you are well!

I herewith confirm the reinstatements were done and the inspections were captured.

I noticed **ANS 23-89** is a male on Logix, but was inspected as a female and **ANS 22-114** is a female on Logix but was inspected as a male.

Can you please confirm the sex of these two animals and request a sex change if needed?

Kind regards

Good day
Hope you well
With regards to reinstating the bulls that were inspected, you can go ahead with them.

The animals
23-69 and 23-89 can be reinstated

24-411 I have to rebrand and reinspect next year because there's been a duplication so you can leave that one out for now.
Many thanks
Irfaan

Subject: 2026 Inspection 0579531NGI Amajuba

Good morning Faizel & Ahmed

I herewith confirm that the inspection conducted on 25 May 2026 was captured, except for the bulls that were indicated for reinstatement. Referring to the attached email dated 18 June 2026, I await your response on how to proceed.

The following animals were inspected as FR's but have a CAN (cancelled) status.
ANS 23-69
ANS 23-89
ANS 24-411
Please confirm whether I should continue to reinstate them and capture the inspection?

Attached is an updated inventory list.

Kind regards
