Hello Marietjie

Thank you for the quick phone call.

As discussed, please update the following animals on LOGIX. It is only 2, not 3!

Once done, please let me know and I will push the genomic parentage verification through!

1) SSX M JRE 24-0018 (0098234321)

-- please change the dam of this animal to SSX F JRE 17-0150 (0086645900)

2) SSX F JRE 24-0031 (6020188154)

-- please update the sex of this animal to a male.

-- please allocate the following as his Dam, SSX F JRE 17-0146 (0086000270) -- she was wrongly allocated to calf 1

-- and the section of this animal should then be Stud Proper.

Warm Regards

Jason
