Dear Ms Prinsloo

RE: REQUEST FOR EXEMPTION FROM PRE-BREEDING CONTAGIOUS EQUINE METRITIS SURVEILLANCE REQUIREMENTS FOR A FOAL NAMED AANDAG FRANJIPANI

Reference is made to the application from a pre-breeding CEM Clearance Certificate for Lang Carel Seder for the registration of the foal Aandag Franjipani submitted by the SA Boerperd Breeders Society and received on 17 October 2024.

Aandag Franjipani is identified as follows:

Computer Number: 0013419007

Date of Birth: 3 December 2016

Sire: Lang Carel Seder

Dam: Vlampie's Mooi Nooi

From the application received on 17 October 2024 and correspondence thereafter, although Aandag Franjipani was bred in South Africa, she has been exported and is resident in Tanzania.

The Director: Animal Health has considered the application for exemption received on 17 October 2024 and hereby confirms that the Directorate: Animal Health has no objection to the registration of Aandag Franjipani with regard to CEM:

- Aandag Franjipani is not kept in South Africa and is thus not considered subject to the South African CEM surveillance programme that is part of the animal health legislation controlling the risk of CEM in South Africa. Thus, registration of the Tanzanian resident horse Aandag Franjipani by the breed registering authority in South Africa will not be subject to a CEM Clearance Certificate in terms of the Animal Diseases Act 1984 (Act no 35 of 84).

Please note that the above does not in any way substitute any of the animal health requirements that would be imposed for the import of Aandag Franjipani into South Africa in terms of the Animal Diseases Act 1984 (Act no 35 of 84), nor does it alleviate any requirements for registration by the breed registering authority in South Africa, as set out in any other official document, nor does it constitute an exemption from compliance with any other relevant Act of the Republic of South Africa.

We thank you for your kind support

Yours sincerely,

Dr Mpho Maja
DIRECTOR: ANIMAL HEALTH
