Hello Twane and Janine

Thank you for the email.

Yes, I can confirm that WO 17-0069 is not the sire of WO 23-0100 with the genomic test.

-- I am unable to discover the true sire as he is not yet genomically tested

WO 17-0069 has 8 genomically tested progeny, 5 verified and 3 conflicts.

I see the following information from Charne below;

WO23-0100 (26368U004): Kan een van die volgende passings moontlik wees:
WO19-0344 (7971U005) of **WO17-0069** (A448033)?

-- WO 19-0344 is not genomically tested, and thus is from the DNA the qualifying father.

-- because the genomics rules out WO 17-0069.

Warm Regards

Good day Jason

See attached mail from Frans.

Can you please confirm the sire that was tested?

Have a great day
