Nicely done Michelle!

Liezel, it will look like this on the DNA page

ZOOOMICS (ZOCA2026/113899)	25-JUN-26	Disease	Retinale degenerasie CLN3	0	
-------------------------------	-----------	---------	---------------------------	---	--

Michelle, I have indicated the rest of the Hereford animals tested below, with the ZooOmics DNA number.

Please let us know when it is done!

-- please use this email as the ESB Document for these animals, they only made the report for the animals we already loaded!

Hi Liezel

I have recorded the Delayed-Onset Retinal Degeneration_CLN3 results of the attached animals. The records were successfully uploaded on the database.

Jason will forward the rest of the results.

Kind Regards

Michelle

Hello Table Hill Farming PTY Ltd

I trust you are well.

The latest results for the animals you requested to be tested for Delayed Blindness (CLN3) have come back from the lab.

I have attached each animals certificate from the lab, but have summarised your animals below;

Animal	Result	Genotype
KC 22-0016	Clean	0
KC 23-0021	Carrier	1
KC 23-0018	Carrier	1
KC 22-0011	Clean	0

@**Michelle Bam**, when I am back at the end of this week after my trip to Parys, I will indicate to you how we can load these DNA Certificates against the animals that have been tested.

-- Liezel, I will send you an update once this has been completed on the LOGIX side.

Please let me know if you have any questions.

Warm Regards
