Hi Twané,

Thank you but the Dam is 18-0802 WIL (PC 008 8417 654) and it is a Multi-Sire. We will do DNA hair sample testing when the calving season is over.

Please could I ask you to change the records.

Thank you.

Kind Regards,
Fallon Meyer

Good day

26 0005 is now on the system (6020673817) with dam HS 18 0132 and sire RLR 22 0057.

Have a great day!

Morning Twané,

Hope you're well.

I have entered the birth notifications again after our phone call yesterday with the issues. I received the notification of the capturing, and then the email saying it was processed. I have attached both attachments. You will see on the captured and processed mail, it does not show animal 260005 being captured and processed and no PC number, but it was part of the animals entered and submitted. Could you please confirm for me that this animal is on the system and provide me with the PC number.

Thank you.

Kind Regards,
Fallon Meyer
