Beste Lea

Ek het nou agter die kap van die byl gekom. Met die aankoop van diere van Harry gedurende droogte het die kalf RAS200028 by hom aangekom en ek was onder indruk dat dier nie aangeteken kon word en ek het dus nie verder sy gewigte geneem en daarom net sy speen indeks beskikbaar. Ek aanvaar daarom dan net as basisdier gekeur.

Groetnis

Dawie

More almal, wil net seker maar - die dier is reeds in Logix as SP - moet die dier afgradeer na F0?

Groete.
