Hi Lea

The following 2 animals need to be reinstated and inspection info loaded
ZAM230107 - reinstate plus inspection. Please see note on original inspection sheet about wean index. Did ask Ann to recalculate test as it still reflex the wrong index!
ZAM230114 - reinstate plus inspection. Hanna was requested to check sire in genomic profile as bull have a genomic profile to correct MSire status of bull. Sire should be LFR190008.

Thanx for all your kind assistance.

Regards

Johan
