Dear Marietjie

Trust you are keeping well.

Please would you kindly have a look why **CS260027** (Female)(born 03.04.2026)has not been registered on studbook.

Sire: **AB200096**

Dam: **CS180024** was registered but she died on 28.04.2026 of red water.

We would really like to reinstate that calf as both parents were registered.

I had erroneously notified Bengu that it was CS180025 was the dam of that calf but later realized that CS180025 was still alive when she pitched up at the dip and that the dam was CS180024 that died of the calf CS260027.

Kind regards

Rose Sheard
