Hi Chantelle!

Hope you are well!

We should register as new animals with the sequence number 5001, 5004 and 5007 since they are females from another herd from Establecimiento San Marcos.

Please tell me if you need something else.

Thank you so much for your help!

Kind regards,
Lorena

Hi Lorena,

Thank you for your email.

Please help me understand. Do you want me to physically change SAN 24-3001, 3007 and 3004 to 5001, 5007 & 5004 only

Or must i load new animals as 245001, 5007 & 5004, meaning 3001, 3007 & 3004 must stay as is in Logix.

Keep in mind SAN243004 is a male, so if you only want me to change sequence numbers, SAN243004 will be deleted from Logix for this is a male, then I will recaptured SAN233004 as SAN 24-5004?

Hi Chantelle

Thank you so much for your reply.

Regarding your questions, I forgot to check whether those sequence numbers were already taken. Here are the changes needed to register them :

1. SAN 24-3001 - Register this female as SAN 24 5001
2. SAN 24-3007 - Register this female as SAN 24 5007
3. SAN 24 3004 - Register this female as SAN 24 5004

Please tell me if you need something else.

Thank you so much for your help!

Kind regards,

Hi Lorena,

Hope you are well.

The attached list of animals have been captured as Appendix A, except for the following animals already in Logix as SP. Please let us know if they must downgrade or stay SP.

SAN 24-3001 - 0098873615 (F)

SAN 24-3007 - 0098890965 (F)

SAN 24 3004 - 0098891047 (can not be A - for this is a male)

Thank you

Hi Lea y Chantelle

Today I'm writing to you because we need to register some females from Establecimiento San Marcos (0598646BON) approved as A by the inspector Diego Mete (0726270BON) on July 31, 2026.

Please tell me if you need something else.

Thank you so much for your help!

Kind regards,
