Oh!! Well Done...Thank you, Michelle...and thanks for the screenshot!!!

You can see this is doing my head in!!!

I'll check whatever lists I can ...I was working off the 2025 Per Capita list together with the current one.. not remembering I'd asked you to re-instate...if those cows are on the farm, then they need to be registered with you!!!

The average weight of the first five 2023 heifers is 161 kg ...let's make PB 230003 160kg and PB 230004 162 kg!...weighed on 02/02/24

PB 250015 weighed 201 kg on 19/03 2026. PB 250014 was out of sink and weighed 168kg on 17/04/26 and much lighter than her peers that year...must have been sick and is no longer in the herd.

Thanks for changing the names of the cows...and thanks for the ongoing help.

Best wishes

Anne

Subject: Re: Pending cattle

Afternoon Anne

We will solve all these problems for you

If you sent to Charne we will wait for her to send you the results, please forward them to me aswell seeing that they don't send is directly to us anymore

If you can give my estimate weights for PB230003 & PB230004 then I can let Ann load them (I must just unfortunately have this in writing)

As for PB250014 & PB250015 I can let Ann load them for us, just give me the dates on when they were weighed

PB230022, PB230029, PB230061 & PB230067 you asked me to reinstate them - see attached email- if they are not suppose to be on you per capita just let me know

Then I have chaged the names of PB250047 & PB250060

Kind regards

Michelle Fisher
