\* More than one qualifying mother and/ or father identified for offspring  
\*\* Either mother or father can qualify as parent; no parent pair identified

Most likely parent allocated from parent list provided. No statistical support.

### Disclaimer

Parentage is performed using the parental candidate lists (potential mother and/or father of the offspring) provided by the client.

It is the responsibility of the client to provide ZooOmics with all potential father and/or mother candidates. This includes all AI and cover candidates. Should any extra father and/or mother candidates be added in the future, the parentage assignments may change. ZooOmics (a division of Inqaba Biotechnical Industries Pty Ltd) does not accept responsibility for the effect of any false assignments due to absent parental candidates.

Nothing in this document should be construed as advice to proceed or not to proceed with any specific course of action, as it was not prepared for that purpose.

This is a parentage summary, summarising the potential parentage assignments for a specific order and not an official parentage certificate. Finalised results are sent on official certificates.

This parentage summary supersedes any previously issued parentage summaries.
