Please could you also let me know once the status has been applied.

Thank you!

Hi as soon as my program works, I'll change it to PET status, you don't need to worry only you can give SABBS permission to change the status to breeding.

We don't just change statuses. As soon as I receive an email, I go check why dog is PET cause this email is saved on the dog's number, then we will contact you directly to ask for permission.

Her chip number is 953010007772191  
My name is Megan-rose Girling

If I was to rehome the dog, how do I make this so that the next person is unable to take the PET off. I do not want her used for breeding.

Kind regards,  
Megan

Hi we don't need permission to sent out a certificate I'm sorry.

Send me the dog's details I'll make it PET for you.

I'll need the chip number.

Hi,

Yes I'm the owner, which details do you need to make the dog PET please?

I mean, if a random person asked for her certificate, would you send that out or would it need my permission?

Kind regards,  
Megan

Megan

We can only make the dog PET if you are the owner you can sent me the details of the dog to make it PET status, then no breeding is allowed.

Unfortunately certificates are sent out to assist members and owners to do breeding selections, we cannot block that.

Marisa

Hi,

Just a quick enquiry, I currently own a boerboel who is registered under my name.

Would it be possible to place a breeding restriction or 'non-breeding marker' on the dogs file?

Please could you also confirm the security on a dogs file, to forward the SABBS certificate to someone else, would permission be needed by myself?

Kind regards,  
Megan
