I was trying to find the results but can't find them. If my memory serves me right, the DNA was done by previous owner Jackie Izzo at the time of appraisal in New York 2024 I believe with (Unistel)?.

I know the DNA was completed because we registered the litter. On the per capita you have the DNA number noted as this:

Raya SABBS # 438225 DNA 4297791A
Triton SABBS# 426588 DNA X180678

Is that something you can use? I'm also just double checking with Animal Genetics, who is what I normally use.

Can you use these numbers that are on the Per Capita Knull list. I no longer have these dogs to retest.

Paula

Do you have the DNA of the parents for some reason it does not show on logix? I need to load them again please.

Hello,

I had a customer ask me for their birth cert this morning from a few years ago, she is going to get him appraised this fall and when I looked I realized I left him off my original email to sabbs. T

Can you please add him to this litter. As you can see, his microchip is in sequence with the other puppies from this litter. Thank you and I apologize for the error.

It is the first puppy I added, Barbarian Abel. The others were registered some time ago.
