Attachments: New Born Calves.docx

Good day Evelyn

Kindly find attached new calves for September highlighted in green.

Also please see below answers to your last email in red.

- TRB 260002 born 06/01/2026 to cow AVW 190053 Is the birth date correct as this calf was born 18 days too late to fall in with the minimum breed standards. Was her birth date not possibly in December 2025? Please check your records. (Birth date is correct - 06/01/2026)
- TRB 250076 and TRB 250065 both have rather large Inter-calving periods. Did these two cows not possibly have 2024 calves? (Both were calves in 2025, TRB250076 (Mom CS2077) and TRB250065 (Mom 18367))
- TRB 250019 The mother TW 200022 has a problem with her father – according to the Genomics test her father is not correct. The calf can therefore not be recorded until the parentage problem has been solved. (Father unknown, but is one of Tsar Beef herd, calf born at Tsar Beef Farm)
- TRB 250017 The days between her 2025 and 2024 calves are too few and this calf can therefore not be recorded. Is this her calf or possibly belong to another cow? Please check. (She did not have a calf in 2024, she (Mom TW1830) had a calf on the 16/04/2025 which is TRB250017 and again on the 01/09/2026 which is TW26034)

Then the Newborn 2026 calves:

- TRB 260026 with mother RPE 210042. The last calf on record for this cow was born 15.09.2023 – she should have calved in either 2024 or 2025 failing which the 2026 calf cannot be recorded, and the cow should be cancelled. Please check for previous calves. (Mom RPE 210042 miscarried, so TRB260026 is her second calf since her arrival at Tsar Beef, not sure if she had previous calves)
- TRB 260027 The mother THE 200217 is a Male animal and not in your herd. You do have THE 200216 is this not possibly the mother of the calf? Please confirm. (Mom is indeed THE 200216)
- TRB 260030 BBM 210127 – This cow is not in your herd and is also not an approved animal. Please check for the correct identity. (BBM 21127 is at Tsar Beef Farm with calf TRB 260030)

The balance of the calves have all been recorded and are on record.

Cancellations:

TRB 260021 This calf is not on record as her mother BZN 220008 is not in your herd and also unapproved. Please check on the correct information for the cow. (BZN 220008 is at Tsar Beef Farm with calf TRB 260021)

PROBLEM COWS:
