Good evening Linette, Marietjie, Michelle

Attached please find the updated list of Foleshill birth notifications.

Those in black ...the first calving heifers...have already been submitted but those in red need to be recorded, please.

We will really only be able to confirm the sires once they have been DNA tested.

They were synchronized, inseminated and the pick up bulls were put in

but then WO 22-43 then went down with three day stiff sickness , so SLM 21-01 was used to replace him.
