Hello Lea

Okay so the genomics will always override the DNA Test

-- but have a look at the DNA result here, it says the mother does not match and it gives a different father as to what the genomics says.

-- I suspect the sample for this test in August is wrong!

So just leave this animal as is, the genomic profile for CCB 20-0001 will come around soon

More Jason,

Vraag asseblief, in Julie het Unistel Genomies GMS 160300 as vaar bevestig vir OBB 250069. Sien verslag aangeheg waar nou in Augustus, vaar CCB 200001 bevestig word? Staan die pa dan steeds oor dit Genomies getoets was en al is daar nuwer uitslag in Augustus? Dis dan dieselfde lab?

Dankie.

Goeie more Lea,

Hoop dit gaan goed met jou.

Kan jy asb vir my die DNA laai by logix sodat ek dit kan deur trek op Bengu.

Groete,

Johann de Jager

Good day

Please see attached the result of the abovementioned batch.

Is the below cow match possible?
034: OBB21-0150 [15547U011]

We appreciate your support and look forward to working together again soon.

We trust that all information provided to us is complete and correct. We can only provide results with the information we currently have on record. Some STR profiles used in parentage analysis may have been sourced from another laboratory. While every reasonable effort is made to prevent incorrect results, Unistel Medical Laboratories does not accept any responsibility for parentage mismatches due to incompatible marker scoring strategies between laboratories.

Kind Regards,
