Subject: Error List

Hallo Farrah

Please find attached an updated error list.

You can ignore my previous emails as this is the last to be solved on your error list.

1. T26-061

The interbirth period is to big – exceeds 730 days. If **T19-023** did not calf in 2024 / 2025, she will have to be cancelled due to not complying to reproduction standards. **Please cancel as there was no calf.**

2. T26-502

Please confirm the correct dam? **T23-046** already has a calf T26-112 on 6 Aug. 2026. **Ill confirm this, I have asked brian to please double check as there must be a written error in the calf book**

3. T26-041

The interbirth period is to big – exceeds 730 days. If **T19-221** did not calf in 2025, she will have to be cancelled due to not complying to reproduction standards. **Please Cancel**

Please confirm whether I should cancel **T19-023** and **T19-221**?

Kind regards
