Good Day

Hope you are all well.. I have updated S Knott's, inventory list and submitted on line. I marked the animals that must be removed from the list.

However I have a list of animals that do not appear on the inventory and would like to find out why they are not there. There are 3 without computer numbers and I can not find notification why this is so.

Apparently there was an error with one of the Bull's that appears on the inventory, which I have requested to be removed as it is the incorrect bull and the correct bull needs to be added.

REMOVE - KCM 150014

ADD - KCM 150041

Please could you check for me and let me know.

Many thanks

Regards
