Hi Tessa

If you could be so kind and assist, please?

FEX170063 is an animal we need to get into the appendix when John comes again, please? She is in test and we would not like to lose her records. There are going to be a few more similar animals. I did mention to Rampie about the additions.

FEX170046 - ☺☺ A little mistake crept in here – don't know who or how? HE is actually a SHE... Could we please correct this identity crisis? Her details otherwise are all correct.

Thanks so much
