Subject: pending cattle

Hi Marietjie

The following cattle that are pending

DF 16008

DF 16006

DF 16007

DF 160042

DF 160032.

DF 16009

DF160059

DF160021

For no wean weights I sent it through the minute I wean the calves but I have resent it today. So please Siebert what is happening with my data that I am sending from Beefpro because clearly you are not getting it. And when has it become compulsory for you to have a wean weight or your animal is going to be pending.

The following cattle do not and will never have wean weights as the farmer has never weighed them.

NLA 140013

NLA 140019

NLA 150010

NLA 140014

Please can you get DF 120027 back on the computer as she is active and I am not sure how she was culled on the 4.4.2019 and then again on the 24.4.2019.

As you will see I sent you a email that I sent to siebert month ago about the calf DF 180048 and df 180084.

Just to let you know how I know that I have sent the wean weights off is because when you re send it from beefpro it tells you that you have sent it.

Thanks

Douglas Fletcher
