Marietjie,

Gaan asb voort met die herinstelling. Baie dankie.

Kind Regards | Vriendelike Groete

Middag Danie

Ek soek asb toestemming vir die herinstelling en dan kan jy ook die geboortes kan sien van Piet Delport se bul waarvan hulle saad gekoop het asseblief.

Dankie en lekker dag!

Hi Michelle,

With regards to the errors on the attached list:

ACM20003

ACM20008

Both of these were sired by PHD110024, semen we bought from Piet Delpert at a novelty auction at the 2017 Angus National Show. I have asked Piet Delpert to send an email to you and Marietjie explaining this in order for the calves to be registered.

ACM200014

I have asked Marietjie to reinstate ACM1749, as she was cancelled in error last year when we finalized our 2019 per capita list

ACM20004

ACM16006 had a bull calf in 2018 and in 2019, Both of them had white marks in front of the navel and therefore could not be registered. The calvings were recorded on our side as commercial calves and the births were never taken up on Logix. I have not entered both the 2018 and 2019 calving on Logix, which should sort out the 2020 calving.

Please let me know once these issues have been resolved.

Regards

Colette Masterson

Dear Breeder

The Logix system is a very refined system and many checks and tests are done before being incorporated into the system. Logix's aim is to ensure that all biological and breed standards are adhered to and thus ensure that reliable (clean) data is recorded for further use in Genetic evaluations. This results in Editing lists, also known as "Error lists" being generated after the clerk cannot resolve the issues, and the breeder must be contacted to obtain further information to record the transaction fully.

Attached is your herd's Editing List and you are kindly requested to reply on every transaction. If such a transaction is not resolved within two (2) years, the transaction will be deleted from the system and you will have to resubmit it. These lists will be sent to you on a more regular basis for the purpose of improving our services to you.

We look forward to hear from you. Please sent feedback to the person from whom this email has been sent and not to Logix.

Geagte Teler

Die Logix stelsel is 'n baie verfynde stelsel en baie kontroles en toetse word op 'n rekord gedoen alvorens dit opgeneem word in die stelsel. Logix het ten doel om te verseker dat betroubare (skoon) data opgeneem word, wat voldoen aan biologiese sowel as rasstandaarde vir verdere gebruik in Genetiese evaluasies. Dit veroorsaak dat sekere redigering eers gedoen moet word voordat 'n rekord aanvaar word in Logix. Om hierdie rede is daar 'n Redigeerlys, ook bekend as 'n "Foutelys" wat die redigeerklerk nie kan oplos nie en die teler moet gekontak word om verdere inligting te bekom om die rekord volledig op te neem.

Aangeheg is u kuddes Redigeerlys en word u versoek om asseblief dringend aandag te gee aan elke transaksie. Indien so 'n transaksie nie binne twee (2) jaar opgelos word nie, sal die transaksie van die stelsel verwyder word en sal u weer die transaksie moet indien. Hierdie lys sal op 'n meer gereelde basis aan u gestuur word met die doel om die diens aan u te verbeter.

Daar word graag van u verneem in die verband. U terugvoering moet asseblief gerig word aan die persoon wat die epos aan u gerig het en nie na Logix nie.

Groete
