Hi Marietjie,

Kindly reinstate as requested, if the cattle have not been inspected – that will be arranged in the next few months.

Danie – Dr Wheeler mostly bought from Chris Purdon and I don't know if Dr Wheeler had a visit last year?

Thank you.

Kind Regards | Vriendelike Groete

Subject: Corrections

Hi there,

I have recently started using logix to manage Vince Wheelers Red angus herd and found out we have left out quite a bit of information which im currently correcting, like bull calves for example that werent entered on the system and a bull we used which isnt on the system so battling to enter new birth notifications, and there has been some confusion. I hope you can help.

4 cows that aren't on the system that once were and somehow got removed are;

cp158171

cp168535

cp168523

cp168544

is there any way we can get them back on?

the bulls computer number is

8229446

and lastly i have 2 pending heifers for some or other reason

0088760244

0088760335
