**Subject:** Korreksie asb  
**Attachments:** P2477-2512\_22.pdf

Middag Twane en Magda,

Vertrou dit gaan goed. Kan julle asseblief vir my 'n verandering op die databasis aanbring:

|           |          |                   |                |                                  |
|-----------|----------|-------------------|----------------|----------------------------------|
| V8 20.487 | P2512/22 | <b>BOS15.5661</b> | <b>SER2385</b> | <b>Included as possible sire</b> |
|-----------|----------|-------------------|----------------|----------------------------------|

P2512/22 was met die vorige verslag V8 20.387, maar dit moet 487 wees asseblief.

V8 20.387 se DNA nommer is P2503/22

|           |          |                   |                |                                  |
|-----------|----------|-------------------|----------------|----------------------------------|
| V8 20.387 | P2503/22 | <b>BOS15.5297</b> | <b>P604/19</b> | <b>Included as possible sire</b> |
|-----------|----------|-------------------|----------------|----------------------------------|

Baie dankie vir julle moeite en jammer vir die fout.

Vriendelike groete,

---

#### **REQUEST FOR DNA PATERNITY VERIFICATION**

Please note that sires can only be included or excluded in the absence of a nominated dam. Inclusion does not automatically imply positive paternity.

The verity of the results depends on the assumption that the submitted samples represent the animals that were indicated by the submitter. Although S.A. Stud Book is notified of all DNA numbers issued, genotyped and parentage results are kept confidential, except when the results form part of the annual mandated parentage verification program conducted by S.A. Stud Book. These genotypes were generated using proven technology for DNA profiling in livestock. While extensive measures were taken to ensure the integrity of these genotypes, the ARC assumes no liability for errors that may arise as a result of their veracity, interpretation and/or use.
