Morning Charl/ Yolanda,

Yes, I confirm that DB 19 51 and DB 19 36 have passed. I've been in contact with Andre(vet) and he will only be able to do the morphology this weekend, the result of which will determine the status of DB 19 50.

My suggestion, in the meantime time, is that whose three be entered into Ermelo and should there be a problem (less than 75% morph) then it will be necessary to withdraw any bull in question. Sorry about the delay in replying. I understand that there is a time deadline.

Regards, Amy.

The number of the bull with the slightly twisted testes is DB190050 (291274520).

Regards,

Charl Hunlun.

Good morning

As discussed telephonically (inspection as on 7 June 2022 – Diepgezet Boerdery):

DB19/05 culled – only one testis

One bull (number ?)– twisted testis, wait for veterinary report before final decision will be made. Can you please forward the number of the bull.

DB19/36

DB19/50

DB19/51

The other two pass inspection.

Amy, when you get a chance, please confirm to make the inspection official for recording. The inspection for these bulls, will also be accepted as the screening inspection.

Regards

More Yolanda,

Dis goed om jou hier in die Santa-kraal te he. Over to English for Amy's benefit.

The bulls were inspected by mrs. Amy Williams on Thursday 2nd June and approved pending a veterinary examination, CA and TB testing and scrotal measurements, which is scheduled to take place tomorrow, 7th June. I will send the results of the examinations and measurements to Amy and then forward it to the office as soon as she has given her final approval. I, however, understands that at least some of the tests may take a while but I will clarify this with the veterinarian tomorrow.

I trust that you will find it in order.

Best regards,

Animal Breeding and Recording Advisor

Goeie middag

Ek is besig met u inskrywing van die 4 bulle vir bogenoemde veiling. Die bulle is nog kalfboek en verneem ek graag of die bulle reeds geïnspekteer is en of wanneer hulle geïnspekteer word.

Groete
