Dear Marietjie

Hope this mail finds you well.

I have a cow that was cancelled in 2019. Question what calf was registered to her in 2018?

67126805	A080355
----------	---------

The correct details for her 2018 calf is :
BULL CALF 597

22/9	36	286	365	474
------	----	-----	-----	-----

	Birth	Wean	12 month	18 month
	22/9/18	15/5/19	20/12/19	20/02/2020

I also use Bengu farm software now.
We also sorting out all the errors.

Must this cow be reinstated to record a 2018 calf or will your records allow it as it was cancelled in 2019?

Regards
Hannes
