ZO2020/1034

Dear Wilhelm,

There are no genetic mismatches between 4X4 110221 and 170121 and 170886, I am confident in the paternity assignment and have attached their paternity certificates.

170151 has one mismatch with 4x4110221 however, the result is still significant so I have attached the parentage certificate. Please note if we have not tested all the potential sires for this sample, it is possible that we may later test a sire that has no mismatches and will

therefore be a stronger candidate as a father.

I see that 170044 has a name
