TOTAL: 10779

CONDITION

- Certification by the exporting country that the number of unfrozen (live) spermatozoa per dose complies with the minimum amount specified on the reverse side of this document.
- DNA profiles must be provided to the Registrar of Animal Improvement, and the relevant Breeders Society before release from quarantine, if not available at time of importation.

This authorization is subject to the compliance with the veterinary requirements set out in the attached permit and is also subject thereto that the intended importation meets with all the provisions of the said Act. This authorization does not exempt the importer from the provisions of any other law. This authorization may be withdrawn by the Registrar should any false information be discovered in the application. This authorization is also not transferable. Imported semen shall under no circumstances be transferred, sold, given or donated to any other person or body unless prior written approval from the Registrar has been obtained. Any such approval shall be considered as new application for the importation of semen.

VETERINARY IMPORT PERMIT FOR BOVINE SEMEN FROM DENMARK [Issued in terms of the Animal Diseases Act, 1984 (Act No. 35 of 1984)]

With reference to Permit No **S0174/20-1** date **2020-06-01** issued in your favour by the Registrar, Animal Improvement Act, 1998 authority is hereby granted to introduce into the Republic of South Africa **10779** doses of semen provided that the following conditions are complied with:

1. The consignment must be accompanied by:
 - 1.1 this original import permit and
 - 1.2 the agreed upon model health certificate (that conforms to the one overleaf), issued by a veterinarian authorised thereto by the Veterinary Authority of **Denmark**.
3. The semen must be adequately, securely and hygienically packed in flasks which were cleansed and disinfected and containing unused cryogenic material; sealed under veterinary supervision and conveyed by air to O.R. Tambo (Johannesburg) International Airport.
4. The arrival of the consignment must be reported to the State Veterinarian or his/her representative **KEMPTON PARK** Tel: **011 393 7980/83/84/85** Fax: **011 973 2828** and may not be removed from the place/port of entry without his/her permission and subject to any conditions imposed by such written permission.
5. The animals which have been inseminated with the imported semen may not be removed from the property for a period of at least thirty (30) days after insemination.
6. Any illness or death of cattle during this period of restriction must immediately be reported to the State Veterinarian of the area.
7. Full records of all sales reflecting the specific end users of the semen must be kept on file and made available to the Directorate of Animal Health on request.
8. The container and receptacles in which the semen is transported as well as all insemination apparatus used must be disinfected to the satisfaction of the State Veterinarian concerned.
9. This permit is valid for **ONE CONSIGNMENT** only and is subject to amendment or cancellation by the Director Animal Health of the Republic of South Africa at any time without prior notice being given.

DIRECTOR: ANIMAL HEALTH

NOTE:

Any wood packing material or dunnage used in the consignment should be subjected to approved phytosanitary measures described in the IPPC: ISPM No. 15. Approved phytosanitary measures include treatment and application of official mark combined with the use of debarked wood. I. IDENTIFIKATION AF SÆDEN/ IDENTIFICATION OF THE SEMEN:

Identifikation af donor (navn og stb. nr.)/ Identification of donor (name and hb. no.)	Race/ Breed	Opsamlingsdato(er)/ Date(s) of collection	Antal strå/ Number of straws	Mærkning af strå/ Marking of straw

EU-godkendelses nr., navn og adresse på tyrestationen, hvor sæden til eksport til Sydafrika blev opsamlet/

EEC-approval no., name and address of the semen collection centre where the semen for export to the Republic of South Africa was collected: _____

II. SUNDHEDSATTESTATION/ HEALTH CERTIFICATION:

Jeg, undertegnede dyrlæge, som er godkendt som tilsynsførende dyrlæge ved tyrestationen, hvor sæden til eksport til Sydafrika blev opsamlet, attesterer hermed, at ovennævnte sæd opfylder følgende betingelser/

I, the undersigned veterinary surgeon approved as an inspector at the approved semen collection centre where the semen for export to the Republic of South Africa was collected, hereby certify that the semen described above meets the following conditions:

1. Sæden blev opsamlet på en tyrestation, der er under mit tilsyn./
The semen was collected at a semen collection centre that is under my control and supervision.
2. Ingen dyr på tyrestationen er blevet vaccineret mod mund- og klovesyge inden for tre (3) måneder umiddelbart forud for opsamling af sæden./
No animal on the semen collection centre has been vaccinated against Foot-and-Mouth disease within the three (3) months immediately preceding the date of collection of the semen.
3. Donortyren har opholdt sig uafbrudt på den omtalte tyrestation, eller på en anden EU-godkendt tyrestation i en periode på mindst én (1) måned forud for opsamling af sæden til eksport til Sydafrika, og i det tidsrum er den ikke blevet brugt til naturlig bedækning og er holdt isoleret fra dyr, der ikke har tilsvarende sundhedsstatus./
The donor bull has been continuously resident at the semen collection centre concerned, or at other such approved semen collection centres for a period of at least one (1) month prior to collection of the semen for export to the Republic of South Africa, and in that time has not been used for natural mating and were isolated from animals not of equivalent health status.
4. Donortyrene var klinisk raske og viste ikke kliniske tegn på sædbårne sygdomme./
The donor bulls were clinically healthy and showed no clinical signs of diseases that are transmitted via the semen.
5. Donortyren er blevet undersøgt for nedenstående sygdomme med negativt resultat indenfor tre (3) måneder forud for datoen for den første sædopsamling til eksport til Sydafrika./
The donor bull has been tested for the following diseases with negative results within the three (3) months preceding the date of the first collection of this semen for export to the Republic of South Africa.

- A) TRICHOMONAS FOETUS (Enten direkte mikroskopisk undersøgelse og dyrkning, eller PCR test)

TRICHOMONAS FOETUS (Either direct microscopic examination and culture test, or PCR test)

Undersøgelsen foretages på to forhudsskylleprøver opsamlet med mindst syv (7) dage

mellemrum/

The examination is carried out on two sheath-washing samples collected at least seven (7) days apart

-) CAMPYLOBACTER FETUS (immuno-fluorescens undersøgelse eller en dyrkningsundersøgelse)

CAMPYLOBACTER FETUS (immunofluorescence test or a cultural examination)

Undersøgelsen foretages på to forhudsskylleprøver opsamlet med mindst syv (7) dage

mellemrum/

The examination is carried out on two sheath-washing samples collected at least seven (7) days apart

- C) LEPTOSPIROSE/ **LEPTOSPIRA**
enten*/**either***

en serologisk undersøgelse for serotyperne: L. hardjo, L. hebdomadis, L. grippotyphosa, L. icterohaemorrhagiae)/

a serological test for the Leptospira serotypes: L. hardjo, L. hebdomadis, L. grippotyphosa, L. icterohaemorrhagiae)

eller*/**or*** donortyren blev injiceret to gange med streptomycin 25 mg pr. kg. kropsvægt med 14 dages mellemrum; den anden injektion blev givet indenfor 7 dage, men mere end 24 timer før den første opsamlingsdag af sæd til eksport/

The donor animal was injected twice with streptomycin at 25 mg per kg bodyweight at 14 day interval; the second injection was administered within seven (7) days, but more than twenty-four (24) hours before the initial semen collection for export

(Udstreg det ikke gældende*/delete as appropriate*)

- D) TUBERKULOSE (intradermal prøve)/

TUBERCULOSIS (intradermal test)

- E) BRUCELLOSE (serologisk undersøgelse ved CFT)/
BRUCELLOSIS (serological test by CFT)
-

- F) ENZOOTISK KVÆG LEUKOSE (agar gel immunodiffusions undersøgelse
eller ELISA)/
**ENZOOTIC BOVINE LEUCOSIS (agar gel immunodiffusion test or
ELISA)**
-

- G) IBR/IPV (serum neutralisationstest eller ELISA)/
IBR/IPV (serum neutralisation test or ELISA)
-

BEMÆRK/ NOTE:

Hvis donortyren har opholdt sig uafbrudt på den omhandlede tyrestation i mere end tre (3) måneder, kan negative resultater for de ovenfor anførte sygdomme accepteres, såfremt undersøgelserne er foretaget i denne opholdsperiode og ikke mere end tolv (12) måneder forud for sædopsamlingen til eksport./

In the case of bull's continuously resident at the semen collection centre concerned for longer periods than three (3) months, negative results for the disease conditions mentioned above will be acceptable provided the tests are performed at the semen collection centre during this period of residence and not more than twelve (12) months prior to the collection of the semen to be exported.

7. Donortyrene er med negativt resultat blevet underkastet en ELISA test til påvisning af antistof eller virus isolationstest for BVDV 1 og BVDV 2 forud for indsættelse på en godkendt tyrestation og er blevet holdt isoleret fra andre dyr, som ikke er blevet testet negative, og for alle donortyrene er en aliquot af sæd fra hver opsamling til denne forsendelse blevet underkastet en virusisolationstest eller PCR test med negativt resultat./

The donor bulls have been subjected to an antigen detection ELISA or virus isolation test for BVDV 1 and BVDV 2 with negative result, prior to entry into an approved semen collection centre and have remained isolated from other animals that have not been tested negative, and all donors have had an aliquot of each semen collection for this consignment subjected to a virus isolation test or PCR test with negative results.

8. Sæden i denne forsendelse er opsamlet fra donorer, der var negative ved to virusneutraliseringstest eller serologiske test godkendt af Directorate Animal Health, til påvisning af antistoffer mod Schmallerberg virus, med den første taget inden for 30 dage forud for starten af sædopsamling og den anden taget mellem 28 og 60 dage efter den sidste sædopsamling, og alle tests blev udført på laboratorier, der er godkendt af den kompetente myndighed./

The semen in the consignment was collected from donors that were negative for two virus neutralization tests or serological tests approved by the Directorate Animal Health, to detect antibodies to the Schmallerberg virus, with the first collected within 30 days prior to the start of semen collection and the second between 28 and 60 days

after the last semen collection, and the tests were performed in a laboratory approved by the competent authority.

9. Donortyren kommer fra en tyrestation, hvor der ikke har været kliniske, patologiske eller dyrkningsmæssige tegn på paratuberkulose (Johne's disease) i perioden på tre (3) år forud for opsamling af sæden til eksport til Sydafrika og frem til afsendelse af sæden. Hver donor er med negativt resultat blevet underkastet en ELISA test for paratuberkulose (Johne's disease)./

The donor bull originates from a semen collection centre where no clinical, pathological or cultural evidence of Johne's disease (Paratuberculosis) has occurred during the three (3) year period before the semen collection for export to the Republic of South Africa and until dispatch of the semen. Each donor has been subjected to an ELISA test for Johne's disease (Paratuberculosis) with negative results.

10. Der har ikke været udbrud af mund- og klovesyge eller vesikulær stomatitis i en radius af tyve (20) km fra tyrestationen i tolv (12) måneder umiddelbart forud for opsamling af sæden til eksport til Sydafrika./

No outbreaks of Foot and Mouth disease or Vesicular Stomatitis have occurred at, or within twenty (20) kilometres of the mentioned semen collection centre during the twelve (12) months immediately preceding the date on which the semen for export to the Republic of South Africa was collected.

11. Sæden til eksport til Sydafrika er omhyggeligt, sikkert og hygiejnisk pakket i beholdere, som er rensede og desinficerede, og som indeholder ubrugt kryogent materiale. Beholderne er forseglet under veterinært tilsyn./

The semen for export to the Republic of South Africa is adequately, securely and hygienically packed in containers which are cleansed and disinfected and contain unused cryogenic material. The containers are sealed under veterinary supervision.

Beholderen er forseglet med segl nummer: /

The container is sealed with seal no.: _____

EMBEDSDYRLÆGEERKLÆRING/
OFFICIAL VETERINARIAN'S CERTIFICATION

Jeg, undertegnede embedsdyrlæge i Fødevarestyrelsen, erklærer hermed at: /

I, the undersigned Veterinary Officer of the Danish Veterinary Service, hereby certify that:

Efter behørig undersøgelse, har jeg ingen grund til at tvivle på rigtigheden eller nøjagtigheden af certifikatet udstedt af den tilsynsførende dyrlæge. /

After due enquiry, I have no reason to doubt the truth and accuracy of the certificate by the official veterinarian.

- 1) Danmark er officielt anerkendt af OIE som et land fri for mund- og klovesyge uden vaccination. / **Denmark is officially recognised by the OIE as a foot and mouth disease free country without vaccination.**
- 2) Der har ikke været udbrud af mund- og klovesyge eller vesikulær stomatitis i en radius af tyve (20) km fra tyrestationen i tolv (12) måneder umiddelbart forud for opsamling af sæden til eksport til Sydafrika. /
No outbreaks of Foot- and Mouth disease or Vesicular Stomatitis have occurred at, or within twenty (20) kilometres of the mentioned semen collection centre during the twelve (12) months immediately preceding the date on which the semen for export to the Republic of South Africa was collected.
- 3) Danmark er officielt fri for IBR/IPV i henhold til dansk og EU-lovgivning, og det er ikke tilladt at vaccinere mod IBR/IPV i Danmark. /
Denmark is officially free from IBR/IPV according to Danish and EU legislation, and vaccination against IBR/IPV is prohibited.
- 4) Danmark er fri for brucellose, tuberkulose og enzootisk kvægleukose i henhold til EU-lovgivning (Kommissionens beslutning 2003/467/EF). /
Denmark is free from brucellosis, tuberculosis and enzootic bovine leucosis in accordance with EU legislation (Commission Decision 2003/467/EC).
