Subject: RE: RESULTS order ZO2020/678

Dear Wilhelm Allers,

Thank you for choosing **ZooOmics™** for your Animal Genetic Services.

Please find attached the DNA profiles (2) for order ZO2020/678.

Note: We could not confirm parentage for sample ZOBOS20-02330 (WA160018). This is because there are too many mismatches in the DNA of the offspring compared to that of the sire and dam for this sample.

The sire and dam used for parentage were FN100587 and FN120533, respectively. Please confirm that these are the right sire and dam to use.

The profiles (unistel) for the sire and dam are limited as they only have 9 comparable markers that we can use.

Please advise on any other sires and dams that we may be able to test against. Alternatively, we will need a hair samples for FN100587 (sire) and FN120533 (dam) in order to generate profiles of our own to be sure of the parentage.

Please do not hesitate to contact me.

Kind Regards/Vriendelike Groete

Keagan Strydom
