Hello wilanna,

No problem at all!

Could you please delete for me for the 3 calves so I can enter correct calf ID's under the other dams: (I can change the not for registration calf id, or i can deleted it,and hold the birth date on the dams record for her inter birth period states, so that you can registered the correct id numbers.)

(Many breeders id the not for registration calf's like this, for example FD 20 9006.

then there is breeders that put only the birth dates of the not for registration calf on the dam's records, it call a Take on document. We allocated a computer number for these birth's. for the dam's inter birth period.) - Is this a different form that I must use for the NFR? Just to avoid confusion in the future as there will always be alot of NFR's but we would still want to record the dam's inter birth.

Kind regards,

Leigh Robertson

Leigh

Sorry i replay know, so many work here.

The calf FD 20 0006 - 0090171802 is registered on the system as a not for registration calf, borne 25-MAR-2020 out of dam FD 14 0611 -0088982590 and had no sire.

The calf FD 200014 - 0090171828 is registered on the system as a not for registration calf, borne 28-MAR-2020 out of dam FD 144113 -0088979711 and had no sire.

The calf FD 200015 - 0090171836 is registered on the system as a not for registration calf, borne 28-MAR-2020 out of dam FD 140279 - 0088941505 and had no sire.

I can change the not for registration calf id, or i can deleted it,and hold the birth date on the dams record for her inter birth period states, so that you can registered the correct id numbers.

Many breeders id the not for registration calf's like this, for example FD 20 9006.

then there is breeders that put only the birth dates of the not for registration calf on the dam's records, it call a Take on document. We allocated a computer number for these birth's. for the dam's inter birth period.

Let me know if I can change this not for registration calf's for you.
