More Tannie Marietjie

Gaan goed dankie en daar by tannie?

Streng gesproke het die teler nou die moederskap by een van die laboratoriums laat doen en die vaderskap by die ander laboratorium laat doen. Die kalwers kan so aanvaar word want die moeder en vaders is geldig.

Baie dankie  
Vriendelike Groete

Môre Danie

Hoop dit gaan nog baie goed met jou.

Ek benodig jou hulp mwr die embrio kalwers wat se DNA nie reg is nie, kan jy help moet ons aanvaar dat dit ouerskap is wat getoets is of nie, want ek en die teler praat verby mekaar hier asb.

Laat weet wat ek moet doen.

Dankie en lekker dag!

Marietjie

Good Day Marietjie

Please find attached all the necessary parentage certificates to confirm the parents of the embryo calves that need to be taken off the PEN/PNV list and loaded onto Mr Hartley's name.

The AC180558;AC180562;AC180562 where tested by Zoo Omics where the Dams were tested and are a match. Unistel was unable to match as they do not have the Dams samples.

The attached report from Unistel states that AC 1800563's parentage is a match and LIL 1869's results were a match therefore loaded in ISAG.

Please would you kindly load the results so that they can be cleared?

Kind Regards

Adrean Verster

Hi Adrean

All the animals AC 180558; 180557; 180562 and 180563 were embryo calves and the DNA was only sire valid and the sire and dam must be valid that is why the PEN/PNV did not change.

When that is done the transfers will be done.

Enjoy the day~!

Good Day Marietjie

Please would you kindly advise as to why the previously mention calves are still not able to be loaded onto Mr Hartley's name?

I see that they are now on an EDIT LIST that says they cannot be transferred and have been cancelled however the necessary information was sent months ago

to be sorted?

Thank you for your help

Kindest Regards
