Subject: Missing birth registration computer numbers

Evening Ann,

I have submitted numerous birth notifications, Duncraggan and Primeston herds, over the last few weeks and have had problems with the issuing of registration numbers for a number of them.

I have worked out that they are all progeny of one bull, Duncraggan Utterly Amazing 223, BSHMBLK 130223, RegNo 0077991834.

We sold this bull to a commercial breeder in 2016 with the retention of semen rights on him, as we had used him in the Duncraggan herd due to his great potential. He broke a tooth and the owner phoned us to tell us that he was shipping him to slaughter. We concluded a deal whereby we swapped him for a younger bull last year, and we used him in our herds again. Unfortunately he died before we could collect semen from him, but we have a number of potential progeny from him, 13 in total, over the Duncraggan and Primeston herds.

The birth notifications in question are:
Duncraggan

BSHMBLK 200553
BSHFBLK 200555
BSHFBLK 200557
BSHFBLK 200558
BSHFBLK 200559
and,
Primeston

BSHFKBS 200070

Please would you see if you can rectify this problem?

Many thanks and much appreciated,
Alistair Brown
