Hi again Wendy,

You are going to wish you stayed on maternity leave with my emails!!

Hermann & Erick gave me a list of all my animals on Logix & I have compared with what I have on Bengu/the field. I think I messed up when I was deleting animals from logix last month as I have a bunch that need to be re-instated (eek, sorry!) I thought I had done things correctly on the system but obviously not, and Erick has told me to just send the stuff through to you rather!

So I have attached a spreadsheet, the first tab is KEEP, they just stay the same so nothing to do there. The second tab is CANCEL, they are no longer on the field, if there is a simple way to send through to you the reasons for their deaths I can do so

The third tab is REINSTATE, these are ones I must have cancelled on logix by mistake!

So I should end up with for now 391 active (REG) animals.

I then have a bunch of births to send through too, but I will do those through the Bengu system, and then once they have been allocated computer numbers I can re-check & see what is missing.

A very long story!!

Thank you so much,
Warm regards
Nicola
