Good day Nina

Thanks!

We have a sale on September 24th and I saw that in Logix a dam is as App A and it should be SP.

Database 0553686BON, female MAN173080 is SP, as well as MAN121710 (mother), and MAN091158 (grandmother). They are all SP females with identify SP sire.

Thanks a lot for the assistance

Regards

Good day

All the calves should be on the system now, if not please notify.

Kind regards

Good day Nina

Thanks for the change in this database.

We sent some weeks ago births of La Ciénaga that are not in the system yet. Is there something wrong with the info?
The RP goes from GAV190787 to GAV190862. The only one that is in the system is GAV190862. Twenty more males are pending.

Let me know what can I do from this side

Good day Nina

Our breeder passed us the wrong information regarding some sires. We realized after we send the information that there were two id already used in females.

The sires GAV190931 and GAV190932 should be as follows.

GAV190931: GAV190965. Date of birth: 22/10/2019. Sire: GAV140401. Dam: GAV160624. Weight at birth: 33

GAV190932: GAV190966. Date of birth: 03/11/2019. Sire: GAV160600. Dam:

GAV160617. Weight at birth: 35

Please let me know if there is anything else you need in order to proceed

Thanks a lot for your help

Regards
